Why should we update our GitHub profile?

Phitron

Programming Hero

Why should we update our GitHub profile?

1

Professional Presence:

- **First Impressions:** Your GitHub profile often serves as a first impression for potential employers, collaborators, and clients. An up-to-date and well-organized profile can demonstrate your professionalism and attention to detail

.

- **Online Resume :** It acts as an online resume, showcasing your coding skills, project experience, and contributions to open-source projects.

Why should we update our GitHub profile?

2

Showcasing Skills and Projects:

- **Highlight Your Best Work:** Regular updates allow you to highlight your most recent and relevant projects, demonstrating your current skills and interests.

- **Portfolio of Projects:** It serves as a portfolio where you can display a variety of projects, from small experiments to major collaborations, showing the breadth and depth of your abilities.

Why should we update our GitHub profile?

3

Continuous Learning and Improvement:

- **Track Progress:** Updating your profile allows you to document your learning journey and track your progress over time.

- **Feedback and Improvement:** Sharing your code and projects can attract feedback from other developers, helping you to improve your skills and learn new techniques.

Steps of updating GitHub profile

- Create a repository by own username.
- Using third-party readme generator to make life easier.
- Generator resources:
  - https://rahuldkjain.github.io/gh-profile-readme-generator/
  - https://arturssmirnovs.github.io/github-profile-readme-generator/
  - https://gprm.itsvg.in/

Phitron

Programming Hero

What should the Readme file should include for a project?

- Brief description about the main features of the project.
- Instructions to run the project on local machine.
- The packages used in the project with version number.
- If some part of the project requires detailed instructions.
- If the project is a Server, then link of the documentation of Postman.
- API endpoints for Backend projects.
- If model or schema was used then the data types.
- Live site links.

Features of a portfolio

- It should be a full-stack application.
- The portfolio should include experience, skills, projects, about me, contact me, blogs. There should be navigations to navigate through those pages or sections.

Phitron

Programming Hero

What information should be in the portfolio

- Your designation
- Your introduction
- A button to download latest resume
- Educational description
- Experiences (If applicable)
- Skills
- Projects
- Contact information
- Blog section
- A footer would be a good addition
